

weeks with whooping cough. The baby has it too but only mild so far, I hope he don't get any worse. He is real good, sleeps most of the time so he really isn't much trouble. The are calling him Peter Francis. I wasn't left very long alone. Betty started to school on Tuesday and he was born at noon on Wednesday. So that was pretty well arranged don't you think. I have lots of company now Betty would much sooner have a book and be in the house than in the field. She is quite a help in the house too. I am feeling pretty good myself now.

Don't know much news. We are having a big fowl supper in Zurich a week

from tomorrow night. It won't be long now till the snow will be flying. Most of the fall work is done, ploughing is the order of the day. We have our beans to thresh yet.

Guess this will be all for this time. Write sometime soon.

Lovingly

Mary.
